BOATERS NO LONGER NEED TO FEAR THE NIGHT.

WIN-TRON ELECTRONICS TO DISTRIBUTE FLIR THERMAL IMAGING SYSTEMS

Spring Lake Heights, New Jersey, December 21, 2006 — **Win-Tron Electronics**, an international leader in the wholesale distribution of marine electronics, announced today that it has reached an agreement with Portland, OR, headquartered **FLIR SYSTEMS, INC.** (NASDAQ: FLIR) to distribute their pleasure craft, yacht and commercial maritime thermal imaging systems. FLIR is a world leader in the design, manufacture and marketing of thermal imaging systems.

The same thermal imaging technologies used by the Coast Guard, Navy and other US government agencies is now available in several low-cost systems. FLIR's thermal imaging systems allow you to see in total darkness, smoke, rain and light fog. Hazards, markers, and other vessels are easily seen, regardless of lighting conditions. Thermal imaging is also the ideal tool for providing onboard ship security and for search-and-rescue operations. Unlike night-vision equipment, thermal imaging is not dependent on light. It detects subtle differences in temperature called heat signatures.

"We are very pleased to offer FLIR thermal imaging systems to our customers," explains Eddie Winder, executive vice president of Win-tron Electronics. "These are world-class products, extremely well engineered, tested and proven in world-wide use for decades and now available in a wide-range of affordable, easy-to-use systems. This equipment is going to open up the world of night navigation to our customers and we anticipate that it will become 'essential' equipment for every serious boat owner."

"We believe the entire maritime market, including merchant marine vessels, high-end yachts and smaller recreational vessels, offers an ideal application for our thermal imaging technology," reflects Lou Rota, FLIR Vice President of Maritime Sales, "and we believe that Win-tron Electronics, with their extensive network of dealers, their proven commitment to customer service and their easy to use online dealer tools, is the ideal partner for us in our efforts to penetrate this market."

Win-Tron will carry the full-line of thermal imaging systems, including Navigator and Mariner. To learn more about these products, please visit our website: www.wintronelectronics.com. FLIR products will also be featured in our full-color 2007 Dealers Buyers Guide, available early 2007.
