### **WIN-TRON ELECTRONICS TO DISTRIBUTE OceanLED LONG-LIFE, LOW-VOLTAGE LED UNDERWATER LIGHTING IN THE U.S., CANADA AND SOUTH AMERICA**

Spring Lake Heights, New Jersey, October 5, 2006 — Win-Tron Electronics, a world leader in the wholesale distribution of marine electronics, is now distributing leading-edge underwater lighting products manufactured by Warwickshire, England-based OceanLED, a pioneer and innovator in the underwater LED (light-emitting diodes) lighting industry.

OceanLED has set precedents in this field, holding patents for a number of their underwater lighting designs. The company has

- developed lighting fixtures that last 40,000 hours without any noticeable loss of illumination and use up to 90% less power than ordinary lights
- developed the world's most powerful LED underwater lighting products (the OceanLED 4010 series).
- developed a super efficient unique optical lensing system where light is magnified, focused and projected in a beam — very similar to how a lighthouse works.

"There are lots of underwater lights on the market today. We choose to distribute OceanLED because they are the highest quality, brightest-by-far and the lowest maintenance lights available," says Eddie Winder, executive vice president of Win-Tron. "We are convinced that these products will satisfy a crucial need for our customers."

Nigel Savage, founder and managing director of OceanLED, explains, "We chose Win-Tron because of their 43-plus years of experience in the marine electronics industry and their extensive network of dealers, installers, boatyards, and OEMs. We were also attracted to Win-Tron's reputation for providing superlative customer service and to their easy-to-use online dealer tools."

Win-Tron will carry the full range of OceanLED's underwater lighting products: THRU-HULL™, FLUSH MOUNT™, SURFACE MOUNT™ and WELD-IN™. For more information about these products, please visit our website: [www.wintronelectronics.com](http://www.wintronelectronics.com). OceanLED products will be featured in our full-color 2007 Dealers Buyers Guide, available early 2007.
